News Feed Your Actions Pull Requests Switch Context

GitHub Bootcamp If you are still new to things, we've provided a few walkthroughs to get you started.

1 Set Up Git
A quick guide to help you get started with Git.

2 Create A Repository
Create the place where your commits will be stored.

3 Fork a Repository
Copy a repo to create a new, unique project from its contents.

4 Be social
Follow a friend. Watch a project.

You've been added to the ninject organization!
Here're some quick tips for a first-time organization member

Use the switch context button in the upper right corner of this screen to switch between your personal context (danielmarbach) and any organizations you've been added to.

After you switch contexts you'll see an organization-focused dashboard that lists out organization repositories and activities.

Switch Context

Friendlier Cocoa Diffs
pbxproj and xib files are now suppressed in commit and compare views. Focus on code, not data!

FINDING THE NEEDLE IN

A photograph of a stone staircase leading up a hillside. The stairs are made of large, dark stone blocks. To the left, there is a stone wall made of rough-hewn stones. To the right, there is a small, leafy tree. The background is a bright, hazy sky. The text "PATH TO ENLIGHTMENT" is overlaid on the right side of the image.
